Warm welcome to Thai Nguyen University, a reputable regional university in Vietnam.

I am incredibly honored to serve Thai Nguyen University as its incumbent President. I am delighted to take on the leadership of this prestigious university and I am humbled and thankful to do so.

At the onset, I wish to inform everyone that I am resolved to do my best for advancing further this university towards a brightly glittering university in promoting its mandated mission in training quality human resources, carrying out of scientific research and technology transfer for the socio-economic development of the region. It is a fact that the role of TNU is becoming increasingly complex as we recognize the importance of global engagement. For this reason, we will strengthen further our international collaboration with different universities and agencies worldwide.

At this juncture, I would like to give credit to all officials, faculty and staff who are the life force of this university, you are the reason it is soaring to new heights of excellence. I am honored to serve alongside with you each and everyday, through hard work and commitment, you are making a difference in the lives of our students and in the future of the 16 provinces in the northern mountainous region that we serve. I am pleased to inform you further that our highest priority at Thai Nguyen University is maintaining our tradition of excellence in education and providing transformational experiences that ensure our students' success. Henceforth, we at TNU should serve our best as a base for the intellectual creation that takes place in our society.

Nevertheless, I am aware with certainty that Thai Nguyen University's best days are far ahead. TNU with the strong working effectiveness of the member-universities, namely: TNU-University of Education, TNU-University of Agriculture and Forestry, TNU-University of Economics and Business Administration, TNU-University of Medicine and Pharmacy, TNU-University of Technology, TNU-University of Science, TNU-University of Communications and Information Technology, TNU-College of Economics and Technology, TNU-School of Foreign Languages, and TNU-International School have tremendous assets that provide a great platform for growth with numerous academic programs, training departments, and centers coupled with global leaders. In addition, TNU has strong and growing research projects, excellent international partnership with prestigious universities worldwide in a beautiful setting, and an engaged and enthusiastic team of faculty, staff, and students.

Please join me in continuing the progress of Thai Nguyen University and let us look forward to a great year ahead.

Best regards,

Prof. PHAM HONG QUANG, PhD
President

LOCATION

Thai Nguyen University is nestled in the picturesque city of Thai Nguyen located in the Northern Midland and Mountainous region - a strategic region for socio-economic, national security, public security, foreign affairs and environmental ecosystem development of the country with potentials and advantages for the advancement of agriculture, forestry, hydroelectric power, mining, tourism industry, and economy.

The Northern part of the country, which includes Red River Delta and Northern Midland and Mountainous Region, is a place where many ethnic minorities live in harmony for a long tradition; said ethnic minorities are accounted for 54.68% - the highest rate in the country with their own cultural identities. This region is noted for its historical, cultural, revolutionary origins and marvelous scenes with a population of approximately 30 million people.

Thai Nguyen is the melting pot of diverse cultures of the Northern Mountain's ethnic minorities, a focal point of cultural and educational activities of the vast northern mountains. With a geographic location as the center of politics and economy of the Northern mountainous region east midlands, Thai Nguyen is also the gateway of socio-economic exchange between the Northern Midlands and Mountainous and the Red River Delta. Considering that Thai Nguyen University is strategically located in Thai Nguyen Province, it appropriately befits as the center of higher education in the northern mountainous region.

HISTORY AND DEVELOPMENT

Thai Nguyen University (TNU) is a public university which was established on April 4th 1994 by reorganizing and merging 04 local universities and 01 vocational school in Thai Nguyen Province. Currently, TNU has 11 university/school members, 15 training centers and research Institutes and 03 training supporting units.

Thai Nguyen University is composed of

■ ***Eleven (11) university and school members***

TNU University of Technology

TNU University of Education

TNU University of Agriculture and Forestry

TNU University of Medicine and Pharmacy

TNU University of Economics and Business Administration

TNU University of Sciences

TNU University of Information and Communications Technology

TNU College of Economics and Techniques

TNU School of Foreign Languages

TNU International School

TNU's Branch in Lao Cai

■ ***Fifteen (15) training centers and research institutes***

TNU Institute of Life Sciences

TNU Research Development Institute of Advanced Industrial Technology

TNU Research Institute for Socio-Economics and Humanities in Mountainous Areas

TNU Institute for Health Economics and Social Affairs

TNU Institute for Green Economics Research

TNU Institute for Science and Technology

TNU Practical Hospital

TNU Center for National Defense - Security Education

TNU Center for Information Technology

TNU Center for Pre-doctoral Training

TNU Center for Distance Education Training

TNU Center for Human Resource Development for Foreign Language Studies

TNU Center for Research and Education Cooperation

TNU Center for International Cooperation

TNU Geographic Information Systems Center

■ ***Three (03) training supporting units***

TNU Journal of Science and Technology

TNU Publishing House

TNU Learning Resource Center

■ Thai Nguyen University Statistic (in Dec. 2017)

MISSION AND VISION

■ Mission

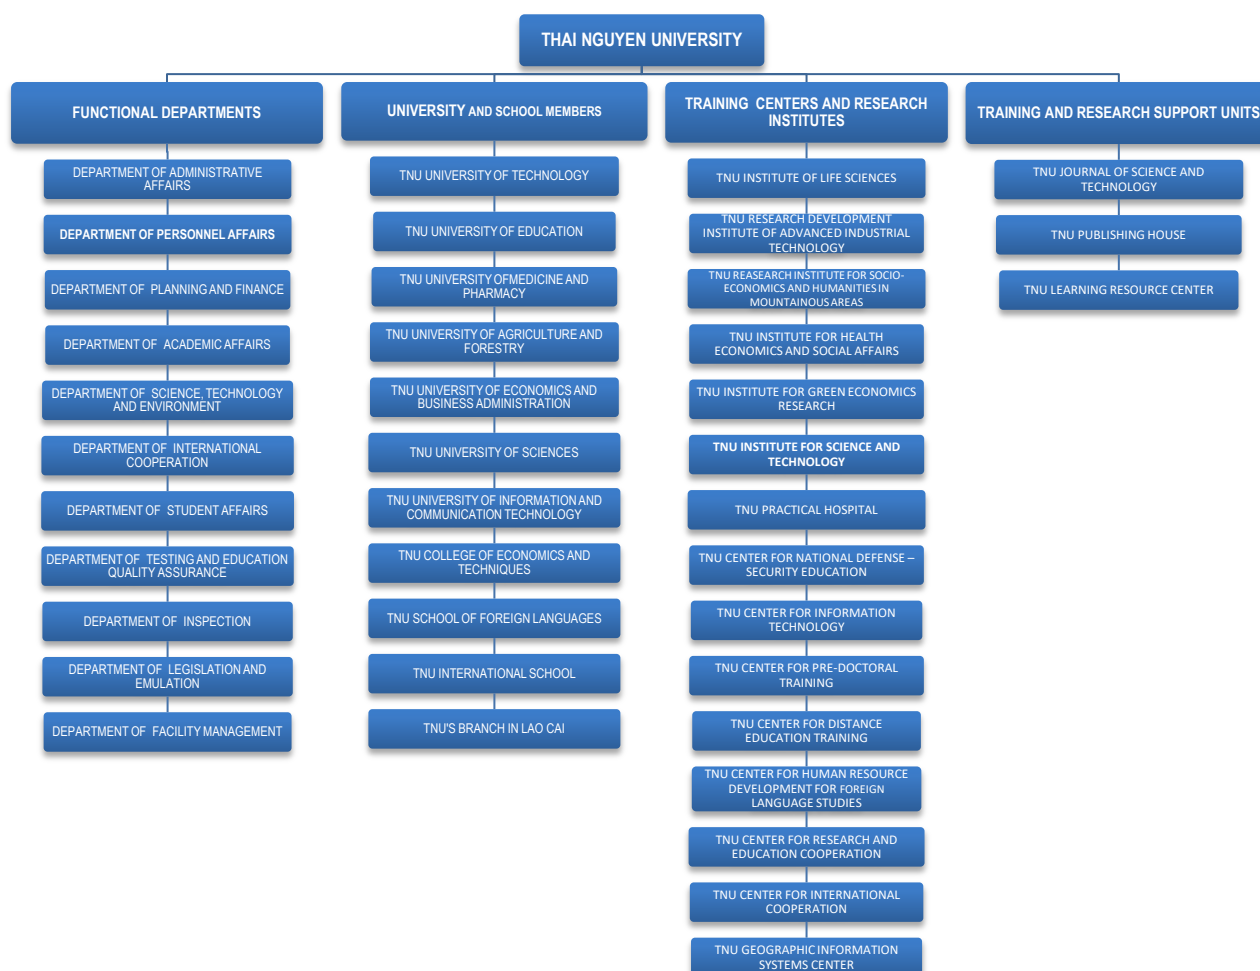

TNU is mandated as one of the key national and regional university of multi-disciplinary training; an advanced research & technology transfer center; contributing effectively for the socio-economic, political, historical, and cultural development of the Midlands and Northern Mountainous Region.

TNU is the training center of high quality human resources; an excellent scientific research & technology transfer center, especially in key areas such as: Education, Agriculture - Forestry, Health, Economy, Industrial Technology, Foreign languages, and Information Technology.

■ Vision

Thai Nguyen University will emerge as the foremost higher education institution in Vietnam inspiring excellence and innovation.

ORGANIZATIONAL STRUCTURE

INFRASTRUCTURE AND FACILITIES

Up to 2018, the total floor area of the TNU building is 406,769 m², to meet the needs of the auditorium, laboratories, workshops, offices for staff, faculty, students, and nearly 30% of houses for the accommodation of regular students. The total budget invested for infrastructure and facilities in the period of 2006-2018 is 1.359.858 billion VND (approximately 65 million USD).

SCIENTIFIC RESEARCH

TNU conducts in-depth research on multi-disciplinary and multi-sector, which closely combines training with scientific research and transfer of science and technology in the following areas:

- Basic Sciences: Mathematics, Physics, Chemistry, Biology, Environmental Science
- Development of agricultural crop production, conservation of high-economic value medicinal plant gene banks
- Research and development in forestry production and forest specialties
- Research and development of aquaculture
- Solutions for improving the quality of education, human resource development, preservation and promotion of the cultural diversity of peoples in the fields and finite chain rings Northern midland and

Notable scientific research achievements

- Intelligent strong-box using digital lock
- Student attendance checking software by face recognition
- Automatic irrigation system
- A modification of the Nevanlinna - Carton theory for jolomorphic curve
- Adsorptive Removal of Copper by Using Surfactant Modified Laterite Soil
- Study of local density fluctuations in liquid and amorphous iron using molecular dynamics simulation
- Volatile constituents of three Pollanthes species flowers from Viet Nam and their inhibitory activity
- Research on formulation of sustained released glipizide matrix
- Research on formulation and in vivo evaluation of metronidazole tablet releasing in the colon
- Study on prevalence and relative factors of autistic children in Thai Nguyen province and assessment results of treatment
- Studying and developing the virtual reality system of mature human body to serve for the training of medical staff
- Research on producing wood glue by adopting Japanese technology
- Research on preventing and controlling greening disease and testing new varieties of orange in Ham Yen, Tuyen Quang
- Research on transgenic soybeans for insect resistance
- Research on methods for nitrogen rate prescription for corn using digital image analysis

mountainous area.

- Development of model for enhancing capacity of village medical staff, technology transfer of cultivation of medicinal resources in Northern region
- Solution of mechanizing and electrifying agricultural and forestry production
- Advanced Technology: Biotechnology, technology and materials science, nano-technology and life sciences, information technology, electronics and telecommunication technology
- Solutions for restructuring in rural mountainous areas
- Environmental protection and sustainable development

parallel machine scheduling problem with minimum total completion time

- Review article skew constacydic codes over finite
- Environmental efficiency and economic losses of Vietnamese tea production: Implications for cost savings and environmental production
- A novel efficient method for nonlinear boundary value problems
- Improvement in irrigation water use efficiency: A strategy for climate change adaptation and sustainable development of Vietnam tea production
- Study on gastric cancer stem cells
- Study on the role of enteric nervous system in the gastric cancer - The role of the enteric nervous system in gastric cancer stem cells regulation
- Explore the value of folk culture to develop tourism in Thai Nguyen Province
-

International cooperation is a critical task to promote the mission of training and scientific research. International cooperation activities are deployed in various areas:

- Establishing the agencies for the implementation of international joint training
- Importing advanced training programs of foreign countries
- Exchanging faculty and students with foreign countries
- Organizing international programs and projects

Faculty and international students exchange programs

TNU actively exchanges teachers and students with universities of the US, UK, Korea, Japan, Singapore, Israel, etc.

TNU is implementing the International Association for the Exchange of Students for Technical Experience (IAESTE). To date, hundreds of students graduated from TNU have had the chance to undergo Internship in many countries, territories and regions all over the world.

International funded projects

TNU has implemented many international projects, particularly in 2017 with 17 projects, 2/3 of which were on scientific research and technology transfer

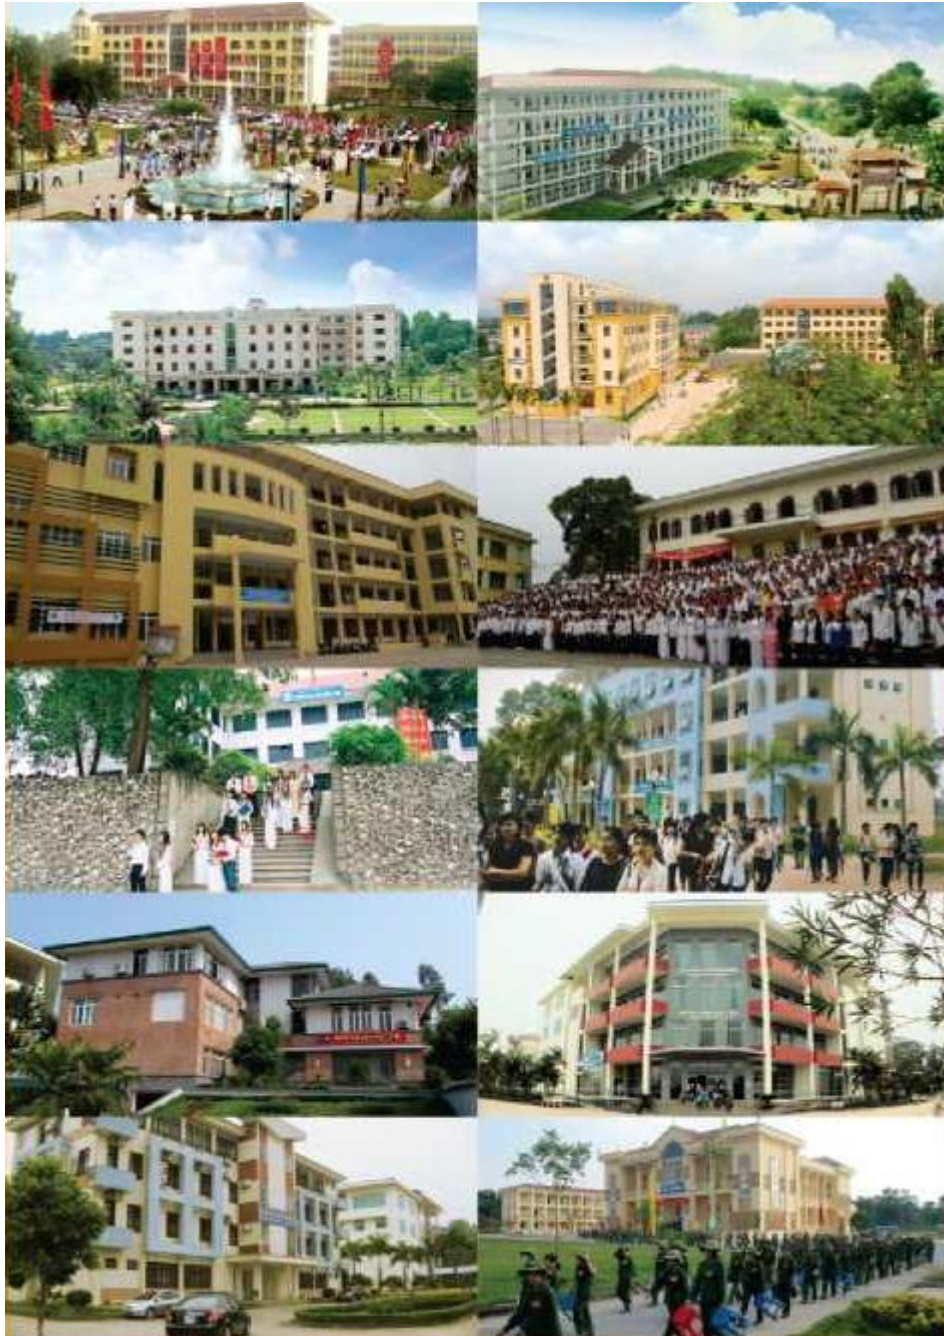

International Cooperation has supported scientific research, contributing to socio-economic development of the Northern Midland and Mountainous Areas
